Design without compromise: EFLEX-10 extends the range of EFLEX® door loops to provide a permanent power supply for any surface-mounted locking device on a door leaf, or a status or position contact.

This product, with its strong identity and many technical and functional advantages, offers the ideal solution for your installations:

- Square caps enhanced by diamond texture, the SEWOSY visual signature (made of zinc alloy – finish light grey RAL 9006 powder coating)
- Stainless steel spring - length 400 mm
- Internal spring diameter of 10 mm (external 13 mm), to meet the most frequent requirements
- Anti-tear system for improved security and protection against vandalism
- Integrated screw shank for guidance when fastening the central screw (one single screw for time-saving installation)
- 2 fixing screws supplied
- Plastic-free packaging

SEWOSY's expertise: perfect integration into equipped sites, reliability of the EFLEX® range of door loops combined

with mounting rapidity, are all assets that will give your projects a real boost!
