For swing gates with leaves up to 2 m, surface mounted.

Electromechanical gear motor 24 Vdc.

Gear motor characteristics:
• **reliable and silent:** thanks to the patented layout of the internal components and less moving parts
• **easy to install:** after the gear motor has been assembled, all electrical connections are made from above
• **user-friendly release** with personalised Nice key or standard lock (optional)
• pre-assembled, **mechanical stops** PLA13 on opening.

New control unit MC424L:
• easy programming by pressing a single button
• clutch with anti-crush safety feature
• automatic memorization of limit switches in opening and closing with self-learning function
• pause time programming; partial opening; slowdown during opening and closing

Sophisticated electronics:
slowdown, obstacle detection system, can be linked to the 8.2 KOhm resistive sensitive edge.

No blackout:
continues to work even during power failures using optional (PS124) batteries that fit inside the control unit.
